One Night Grandstand: stadium for a night!

One Night Grandstand infuses a normal kick-about with the media-rich glamour of Highbury or Stamford Bridge. Players can have a kick-about as normal, but add One Night Grandstand and the game is commentated, flood-lit, filmed, and projected onto stadium-style screens above the pitch, complete with stadium sound effects, live motion graphics and action replays.

One Night Grandstand, Bow, July 2005

add the magic of commentary...

Phil Parry training a young commentator

Each game is commentated live through the PA system by a dynamic and exciting football commentator. For the first One Night Grandstand, we had the good fortune to work with the brilliant Phil Parry of BBC London Sport.

find some new talent...

We are currently developing some workshops to train young commentators with different lyrical styles and influences than 'normal' commentary to begin commentating at many different levels of sport.

and kick it off!

We are currently looking for partners and to bring One Night Grandstand to new areas and communities. If you would like to develop a dynamic commentary team, or get hold of the equipment, skills and technology you need to put on a One Night Grandstand for your football tournament or sports event, contact us!

A game in full swing, projections overhead.

More information about the project, news and videos of previous events are available on the website:
